

ELAD ANEDO DAUDET IKEORAH

DevSecOps Engineer | Agentic AI-Powered Automation | Automated Testing Expert

+91 89834 61149 | eladdaudet1918@gmail.com | Maharashtra | <https://www.linkedin.com/in/elad-daudet>

PROFESSIONAL SUMMARY

Accomplished DevSecOps Engineer and Agentic AI Automation Specialist with 6+ years of experience building and deploying resilient, secure, and highly automated systems. Expert in AI Automation Engineering, Machine Learning Engineering, Data Engineering, Test Automation, and Cloud Infrastructure. Passionate about leveraging AI and automation to boost productivity, ensure compliance, and solve complex operational challenges in dynamic, distributed environments.

PROFESSIONAL EXPERIENCE

Automated Quality Assurance Engineer, (Hosono DE) | Oct 2025 – June 2026

(Hybrid Contract) | Tokyo, Japan

- Built and deployed end-to-end n8n and Ansible/Semaphore automations to streamline testing, tracking, and server inventory management, increasing team productivity and providing real-time visibility across client ecosystems like Shopify and Shopware.
- Automated end-to-end testing using Cypress, Postman, and Playwright, ensuring client applications remained reliable with minimal downtime and bottlenecks
- Refined internal LLM-driven automation agent (Hosono AI) to automate data processing and enhance organizational decision-making for a distributed international team.
- Delivered cross-functional remote support, resolving technical bottlenecks for developers and marketing teams across different time zones while maintaining least-privilege access models, MFA, and policy-driven authorization to achieve compliance.

Automated Data Engineer, (A-B InBev) | Feb 2024 - Aug 2024

(Remote Project-based) Prague, Czech Republic

- Deployed Agentic candidate screening in a production-grade system for 2,000+ applicants via AWS CodePipeline, improving matching accuracy by approximately 92% and reducing HR manual review time by over 20 hours.
- Implemented Python-based data pipelines (Pandas, NumPy) to clean and standardize complex datasets, leveraging Regex for PII normalization and resolving schema inconsistencies to achieve 99.9% data integrity.

CyberOps Engineer, (Cisco Systems, Inc.) | Jun 2023 - Nov 2023

(Remote Project-based) | San Jose, CA (Global Headquarters)

- Enhanced SOAR playbooks and security workflows, reducing Mean Time to Respond (MTTR) by 20% and mitigating high-risk security incidents.
- Standardized and automated global security infrastructure using Infrastructure as Code (AWS CloudFormation, Ansible, Terraform, Jenkins), scaling secure network deployment across 50+ sites and reducing provisioning time by up to 60%.

Cisco IT Support & Instructional Assistant, (College of Technology) | Dec 2022 - June 2023

(Onsite Contract) | Buea, Cameroon

- Provisioned and maintained enterprise-grade network infrastructure (routers, firewalls, Identity and Access Management), ensuring full compliance with institutional security policies.
- Improved student learning efficiency by up to 89% by designing and documenting structured enterprise networking protocols for technical labs.

Full Stack Developer, (Rocket 234) | Jul 2021 - Sep 2022

(Onsite Contract) | Douala, Cameroon

- Designed and provided scalable full-stack solutions, ensuring up to 99.99% system availability while optimizing performance and operational costs.
- Orchestrated full SDLC execution and DevOps transformation, automating CI/CD pipelines and infrastructure provisioning, reducing release cycles by over 20% and increasing deployment frequency.

Lead DevOps Consultant, (MisterComp Cameroon) | Feb 2021 - Present

(Concurrent freelance/consulting role) | Douala, Cameroon

- Defined and executed the company's technical strategy, delivering scalable software and automation solutions that ensured 99.9% operational continuity while reducing infrastructure costs.
- Supervised end-to-end product lifecycle and DevOps transformation, providing consulting services across cybersecurity, networking, cloud infrastructure, and hardware systems.

DEPLOYED PROJECTS

- **NEXUS Remote Access System:** A self-hosted remote desktop and device management platform with end-to-end AES-GCM encrypted sessions, real-time screen streaming, and a browser-based control dashboard built with FastAPI, WebSockets, and JWT/TOTP authentication.
- **Smart Learning:** An adaptive AI learning platform using Django, PyTorch and Hugging Face enabling personalized learning paths and predictive analytics.
- **Hybrid Hospital Management System:** A cross-platform (Ionic/Angular/TypeScript) hospital management app for an African healthcare institution.
- **ATHENA AI Assistant:** An offline voice-controlled AI assistant for hardware automation using speech recognition, natural language processing, and local LLMs.
- **XENOM AI Security Assistant:** An adaptive AI security automation companion combining several cybersecurity tools in one.

EDUCATION

- **Vishwanath Karad MIT World Peace University, India, Pune** **Grade: Distinction (Top Tier)**
Master's Degree in Computer Science with **two consecutive merit-based scholarships (CGPA: 3.6/4)**
- **University of Buea, Cameroon, Buea**
Bachelor of Technology in Software Engineering (**CGPA: 3.4/4**)
- **Cisco Networking Academy Training in CyberOps**

SKILLS

- **PROGRAMMING:** Python, Shell Scripting, PowerShell, JavaScript, TypeScript, YAML, SQL (PostgreSQL, MySQL).
- **FRAMEWORKS & API:** Django, Angular, LangChain, FastAPI, Ionic, GraphQL, gRPC, WebSockets.
- **LLMOps & AUTOMATION:** n8n, Make.com, UiPath, Cline, OWASP ZAP, Robocorp, SonarQube, OpenAI API, Grafana.
- **DEVOPS & CLOUD:** Git, GitLab CI/CD, GitHub Actions, Linux, AWS, GCP, Kubernetes, Docker, Ansible, Terraform, Bash, REST APIs.
- **DATA SCIENCE & MACHINE LEARNING:** NumPy, Pandas, Matplotlib, Seaborn, scikit-learn, OpenCV, AI embeddings.
- **SECURITY & QUALITY ASSURANCE:** Selenium, Cypress, Playwright, Wireshark, Nmap, Prometheus, Datadog, Postman.
- **PRIVACY & COMPLIANCE:** ISO 27001, SOC 2, GDPR, CCPA, DPIA, IAM (1Password), MFA, Zero Trust, Vendor Risk Management.
- **COLLABORATION & PRODUCTIVITY:** Slack, Notion, PagerDuty, Jira, Confluence, Trello, Power BI, Toggl, Loom.

CERTIFICATIONS

- **Cisco CyberOps Associate**
- **Google AI Professional**

LINGUISTICS

- **ENGLISH** (Level C2)
- **FRENCH** (Level C2)
- **SPANISH** (Level A2)
- **JAPANESE** (Level A1)
