

ELAD ANEDO DAUDET IKEORAH

DevSecOps Engineer | Agentic AI-Powered Automation and Testing Expert

+91 89834 61149 | eladdaudet1918@gmail.com | Maharashtra | <https://www.linkedin.com/in/elad-daudet>

PROFFESIONAL SUMMARY

Accomplished DevSecOps Engineer specialized in enterprise-grade infrastructure and intelligent automations. Architecting secure, scalable production-ready workflows, Scripts and high-performance cloud architectures by combines cross-domain expertise in Software Development, Quality Assurance, CyberOps, DataScience, and Machine Learning implementation to drive system resilience, strict security compliance, and operational efficiency.

AREA OF EXPERTISE

- Internal Process Automation
- Automation Script Troubleshooting & Workflow Maintenance
- Data Processing
- Design, develop & deploy Agentic AI workflows
- Technical Support
- Automated testing & Quality Assurance
- IAM & Compliance
- Python, JavaScript & Typescript Development

PROFFESIONAL EXPERIENCE

Automated Quality Assurance Engineer, (Hosono DE) | Oct 2025 – Present
(Hybrid Contract) | Tokyo, Japan

- Built and deployed end-to-end n8n and Ansible/Semaphore automations to streamline testing, tracking, and server inventory management, increasing team productivity and providing real-time visibility across client ecosystems like Shopify and Shopware.
- Using Cypress, Postman and Playwright to automate testing and quality assurance, making sure all the clients sites work as intended with minimal downtown and bottlenecks
- Refined internal LLM-driven automation agent (Hosono AI), to automate data processing and enhance organizational decision-making for a distributed international team.
- Delivered cross-functional remote support, resolving technical bottlenecks for developers and marketing teams across different time zones while maintaining least-privilege access models, MFA, and policy-driven authorization to achieve compliance.

Automated Data Engineer, (A-B InBev) | Feb 2024 - Aug 2024
(Remote Project-based) Prague, Czech Republic

- Developed Agentic candidate screening a production-grade system for 2,000+ applicants via n8n workflows, improving matching accuracy by approximately 92% and reducing HR manual review time by over 20 hours.
- Implemented Python-based data pipelines (Pandas, NumPy) to clean and standardize complex datasets, leveraging Regex for PII normalization and resolving schema inconsistencies to achieve 99.9% data integrity.

CyberOps Engineer, (Cisco Systems, Inc.) | Jun 2023 - Nov 2023
(Remote Project-based) | San Jose, CA (Global Headquarters)

- Enhanced SOAR playbooks and security workflows, reducing Mean Time to Respond (MTTR) by 20% and mitigating high-risk security incidents.
- Standardized and automated global security infrastructure using Infrastructure as Code (Ansible, Terraform), scaling secure network deployment across 50+ sites and reducing provisioning time by up to 60%.

Cisco IT Support & Instructional Assistant, (College of Technology) | Dec 2022 - June 2023
(Onsite Contract) | Buea, Cameroon

- Provisioned and maintained enterprise-grade network infrastructure (routers, firewalls, Identity and Access Management), ensuring full compliance with institutional security policies.
- Improved student learning efficiency by up to 89% by designing and documenting structured enterprise networking protocols for technical labs.

Full Stack Developer, (Rocket 234) | Jul 2021 - Sep 2022

(Onsite Contract) | Douala, Cameroon

- Designed and provided scalable full-stack solutions, ensuring up to 99.99% system availability while optimizing performance and operational costs.
- Orchestrated full SDLC execution and DevOps transformation, automating CI/CD pipelines and infrastructure provisioning, reducing release cycles by over 20% and increasing deployment frequency.

Lead DevOps Consultant, (MisterComp Cameroon) | Feb 2021 - Present

(Concurrent freelance/consulting role) | Douala, Cameroon

- Defined and executed the company's technical strategy, delivering scalable software and automation solutions that ensured 99.9% operational continuity while reducing infrastructure costs.
- Supervised end-to-end product lifecycle and DevOps transformation, providing consulting services across cybersecurity, networking, cloud infrastructure, and hardware systems.

EDUCATION

- **Vishwanath Karad MIT World Peace University, India, Pune** **Grade: Distinction (Top Tier)**
Master's Degree (Computer Science) **Awarded two consecutive merit-based scholarships**
- **University of Buea, Cameroon, Buea**
Bachelor of Technology (Software Engineering)
- **Cisco Networking Academy Training**

SKILLS

- **PROGRAMMING:** Python, Shell Scripting, PowerShell, JavaScript, TypeScript, SQL (PostgreSQL, MySQL, SQLite), HTML, SCSS/CSS, PHP, C, JSON, XML, Regex.
- **FRAMEWORKS & API:** Django, Angular, LangChain, FastAPI, Ionic, Symfony, Odoo, GraphQL, gRPC, WebSockets.
- **LLMOps & AUTOMATION:** n8n, Make.com, UiPath, Cline, Autosys, OWASP ZAP, Robocorp, SonarQube, SQLMap, OpenAI API, Grafana.
- **DEVOPS & CLOUD:** Git, GitLab CI/CD, GitHub Actions, Linux, AWS, AWS S3, GCP, Kubernetes, Docker, Ansible, Terraform, SSH, Bash, REST APIs, YAML.
- **DATA SCIENCE & MACHINE LEARNING:** NumPy, Pandas, Matplotlib, Seaborn, scikit-learn, OpenCV, AI embeddings.
- **SECURITY & QUALITY ASSURANCE:** Selenium, Cypress, Playwright, Wireshark, Nmap, Prometheus, Alertmanager, Datadog, Postman, Supertest.
- **PRIVACY & COMPLIANCE:** ISO 27001, SOC 2, GDPR, CCPA, DPIA, IAM (1Password), MFA, Zero Trust, Vendor Risk Management.
- **COLLABORATION & PRODUCTIVITY:** Slack, Notion, PagerDuty, Jira, Confluence, Trello, Diagrams.net, TeamViewer, Power BI, Microsoft Teams, Excel, Toggl, Diagrams.net, Adobe Creative Cloud, Loom, Google Workspace.

CERTIFICATIONS

- **Cisco CyberOps Associate**
- **Google AI Professional**

LINGUISTICS

- **ENGLISH (Level C2)**
- **FRENCH (Level C2)**
- **SPANISH (Level A2)**
- **JAPANESE (Level A1)**
